PROJECT LEARNING TREE

(PLT) is an award-winning environmental education program designed for classroom teachers, 4-H agents, foresters, naturalists, and other youth-serving professionals. The curricula provide educators with engaging activities that promote critical thinking, problem solving, and interdisciplinary approaches to complex environmental issues. If you are seeking objective lesson plans that are user-friendly, fun, rich in content, and oriented for students in pre-kindergarten through grade 12, **PLT IS FOR YOU!**

Reasons to Become PLT Trained

- **IT WORKS!** Students enjoy learning about their environment through innovative PLT lesson plans and activities
- Helps students prepare to make wise decisions about conservation practices and resource use
- **Teaches students how to think, not what to think**
- Works indoors and outdoors
- **Multidisciplinary, with application in science, language arts, social studies, math, and more**
- Formally evaluated, with pre-and post testing research methodology
- **Classroom proven, piloted in schools for effectiveness**
- PLT is an international program that has been in existence 30 years
- **New Revisions! Includes:**
Reading Connections
Differentiated Instructions
Authentic Assessment
Technology Connections
